EDUCATION

Augustana College

Aug 2023 – May 2027

B.A. in Computer Science and Data Science, Minor in Mathematics

Rock Island, IL

- Relevant Coursework: Data Analysis, Machine Learning, Data Structures, Algorithms, Internet of Things (IoT), Assembly, Operating Systems, Software Engineering
- Mathematics Coursework: Calculus I & II, Discrete Mathematics, Statistics and Probability, Statistical Learning

EXPERIENCE

Marketing Data Science Intern (Marketing Analytics)

August 2025 – Present

Augustana College, Communications & Marketing

Rock Island, IL

- Built a **Marketing Mix Model (MMM)** to quantify how marketing channels drove applications for the college
- Unified **multi-source** campaign data using **SQL** and **Python**; created an **outcome-by-channel** summary chart for stakeholders
- Delivered a stakeholder-ready **report/dashboard** with channel **ROI** insights and recommendations to guide budget and campaign decisions

Sports Media Intern

Jun 2025 – Aug 2025

Sports Media Inc.

Colorado, USA

- Built and deployed an automated AI voice agent using the **Twilio Voice API** to scale information gathering, handling **1,000+** calls/week
- Increased call completion rates by **25%** by optimizing conversation flows and integrating **RESTful APIs** with statistical analysis
- Reduced system failure rates by **15%** by implementing error detection and conducting routine code reviews

PROJECTS

Autonomous Lane Detection Raspberry Pi Car | *Python, OpenCV, Raspberry Pi*

- Built an autonomous Raspberry Pi car that used a Raspberry Pi camera to detect lane boundaries in real time
- Added Python code for lane detection, allowing the car to recognize road markings and navigate more autonomously

Automated Workout Log | *OpenAI API, Node.js*

- Developed a **Google Chrome Extension** that automated workout logging, reduced manual entry time by **40%**, and generated structured datasets using AI integration
- Built a **Node.js** backend to process and store **200+ workout entries**, ensuring seamless logging and enabling data analysis

AuraTV | *Flutter (Dart), Firebase, YouTube Data API*

- Created a Flutter-based streaming app with autoplay channel architecture and seamless video queuing
- Optimized a recommendation algorithm using viewing history and an API to improve content personalization

LEADERSHIP & ACTIVITIES

Resident Advisor

Aug. 2024 – Present

Augustana College

- Mentored 200+ students, cultivated inclusive communities, and organized programs boosting engagement by **25%**

Google Developer Group Co-Lead

May 2024 – Present

Augustana College

- Led technical workshops, hackathons, and managed partnerships with tech communities

TECHNICAL SKILLS

Languages: Python, SQL, Java, C, JavaScript, TypeScript, HTML/CSS, R, Dart

Libraries: pandas, NumPy, Matplotlib, scikit-learn, TensorFlow, PyTorch, OpenCV

Technologies/Frameworks: React, Node.js, Express, MongoDB, Flutter, Firebase, Hugging Face Transformers

APIs/Platforms: OpenAI API, Chrome Extension API, Twilio API, YouTube Data API, Raspberry Pi

Tools: Git, GitHub, VS Code, Jupyter Notebook, IntelliJ, Chrome DevTools, Xcode
