

SUMMER PANDEY

Rock Island, IL | +1 309-631-4748 | summerpandey23@augustana.edu | [GitHub](#) | [LinkedIn](#)

EDUCATION

Augustana College, Rock Island, IL

Expected: 05/2027

B.A. in Computer Science and Data Science; Minor in Mathematics

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Software Engineering, Machine Learning, Statistical Learning, Assembly, IoT, Linear Algebra, Probability and Statistics

WORK EXPERIENCE

Software Engineering Intern

Remote

Sports Media Inc.

06/2025 – 08/2025

- Built a production AI voice-agent system using Twilio Voice webhooks and REST APIs to automate inbound calls for a customer-facing service operating at **1,000+ calls per week**
- Increased call completion by **25%** by redesigning conversation flows and adding input validation with fallback handling, cutting mid-call drop-offs
- Reduced system failures by **15%** by analyzing failure modes and adding automated tests, improving reliability of a live customer-facing service

NVIDIA AI & Machine Learning Instructor

Stanford, CA

iD Tech at Stanford University

06/2026 – Present

- Taught AI/ML to **75+ students** using NVIDIA Jetson Orin Nano devices, giving each student hands-on experience deploying models on real edge hardware
- Designed lessons covering **4 computer-vision tasks** (classification, detection, segmentation, pose estimation) from dataset prep through deployment, so students learn the full ML pipeline

PROJECTS AND HACKATHONS

Argus | Python, NVIDIA Jetson, Computer Vision, Gemini AI

06/2026 – Present

- Prototyped a privacy-by-design computer-vision system for operating rooms that runs all inference on-device on an NVIDIA Jetson, enforcing data minimization so sensitive medical footage never leaves the device
- Built an event-detection pipeline for **4 safety events** with human review and, to support real-time edge inference, began developing a knowledge-distillation pipeline that uses a larger vision model to label data for a lightweight YOLO model on NVIDIA Jetson

VentureGain | TypeScript, Supabase, PostgreSQL, React, Vercel

01/2026 – 06/2026

- Built TypeScript pipelines that validate and structure AI-extracted data from **3 input types** (photo, voice, text) into consistent health and workout records
- Designed a PostgreSQL/JSONB schema storing **5 record types** for **20+ users**, implementing per-user data access controls with row-level security to isolate sensitive health data
- Deployed on Vercel with a React dashboard unifying all metrics into a single daily view, integrating Google Fit and Fitbit APIs to automate activity-data syncing and eliminate manual entry

Preventia | Flutter, Firebase, Gemini AI

03/2026

- Won **Best Use of Gemini AI** at HackAugie by building a preventive-health app that generates personalized checklists from demographic and regional risk factors
- Built Firebase data flows powering gamified tracking and leaderboards to drive daily user engagement

LEADERSHIP & ACTIVITIES

Resident Advisor, Augustana College

08/2024 – 05/2026

- Mentored **200+ students** over 2 years, mediating conflicts and organizing community programs

Google Developer Group Co-Lead, Augustana College

05/2024 – Present

- Led technical workshops and hackathons connecting students with professional tech communities

TECHNICAL SKILLS

- **Languages:** Python, Java, TypeScript, JavaScript, SQL, C, Dart, R
- **Backend & Databases:** Node.js, Express.js, REST APIs, PostgreSQL (JSONB), Supabase, Firebase, MongoDB
- **Privacy & Security:** Row-level security, per-user data access controls, input validation, on-device/edge inference, privacy-by-design
- **Systems & Testing:** Linux, Git/GitHub, Docker, JUnit, Mockito, automated testing
- **AI/ML:** PyTorch, TensorFlow, scikit-learn, pandas, NumPy, Hugging Face, NVIDIA Jetson, Gemini API
